

TELECOM & IT

- The division is expertise in Telecommunications, Networking, Office Automation and Projects. The Telecommunications Group is engaged in executing turn key communication solutions for Small, Medium and Enterprises and its operations cover a wide area such as IP Telephony, Key Telephone systems, Intercom systems, Contact Centre Solution, Video conferencing, DECT, Wireless LAN, DATA Networking, Servers, Storage, Two-Way Digital Radio Communication system, Point to Point and Multipoint Links.
- The Networking Group undertakes structured cabling projects, networking projects requiring High end Switches, Routers, Network Security, Firewall and all active and passive components.
- The Office and Home Automation Group carries the full range of office equipments and Home Automation solution to have centralized control over home gadgets like lighting, weather, audio/video etc.
- There is a synergy between all the Business Groups, thereby making SMARTVISION a "one stop shop" for large and small business establishments as well as for homes.
- All activities are supported by a large service set up consisting of trained and Certified Service Engineers and a team of Installers to carry out in house installation and maintenance service.
